

Press Release

Paris, 3rd January 2023

Orri design Gaël Hiétin
by Noppi
Future on Stage jan 23

INTERACT OR RECHARGE,
PRIVACY FOLDS AND UNFOLDS

Paris Design Week Factory Sep 2022, a brand-new French furniture company steps forward, Noppi, whose ambition is to provide calm, whenever you want it, every time you need it.

Noppi's first creation is the chair Orri. Yet is no regular armchair, it echos your state of mind. Feel like sharing, it welcomes you for a social moment. Feel like having time off, it shelters you from your surroundings.

Designed for shared and multifunctional indoor spaces, Orri can be easily deployed to create a quiet cocoon, providing -6dB noise reduction and additional privacy. First people that have tried Orri are amazed by the design, the comfort and the acoustic results.

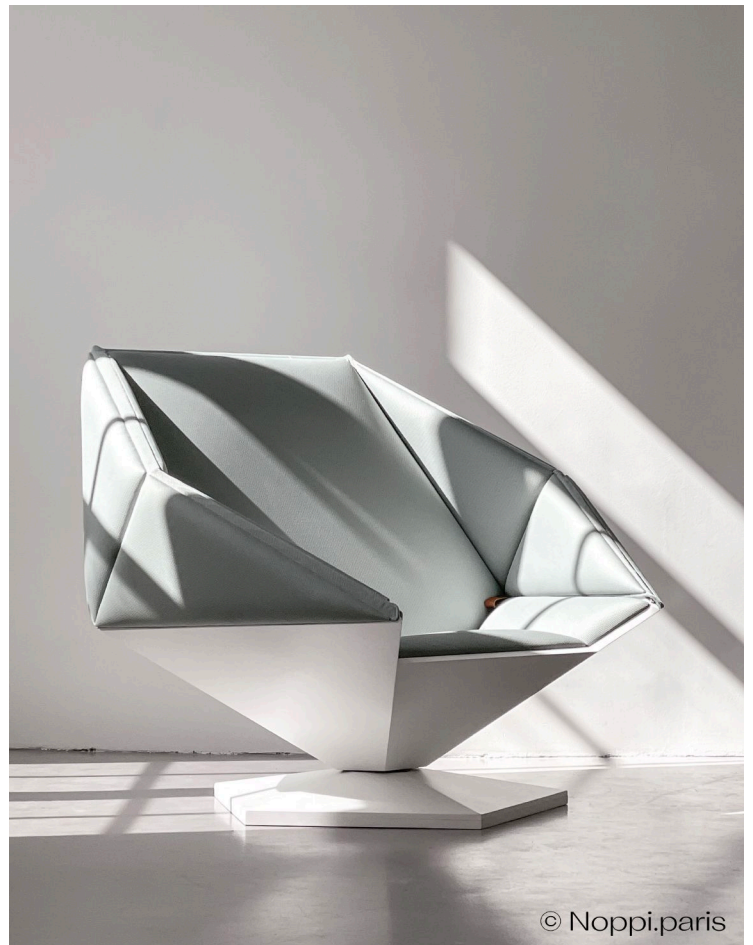

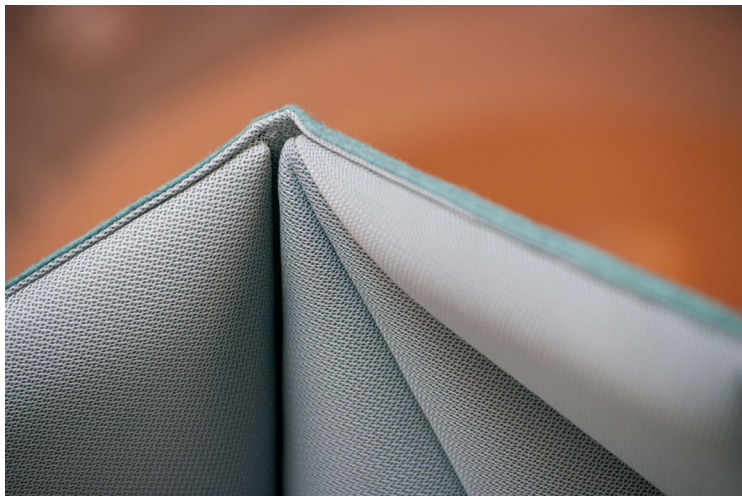

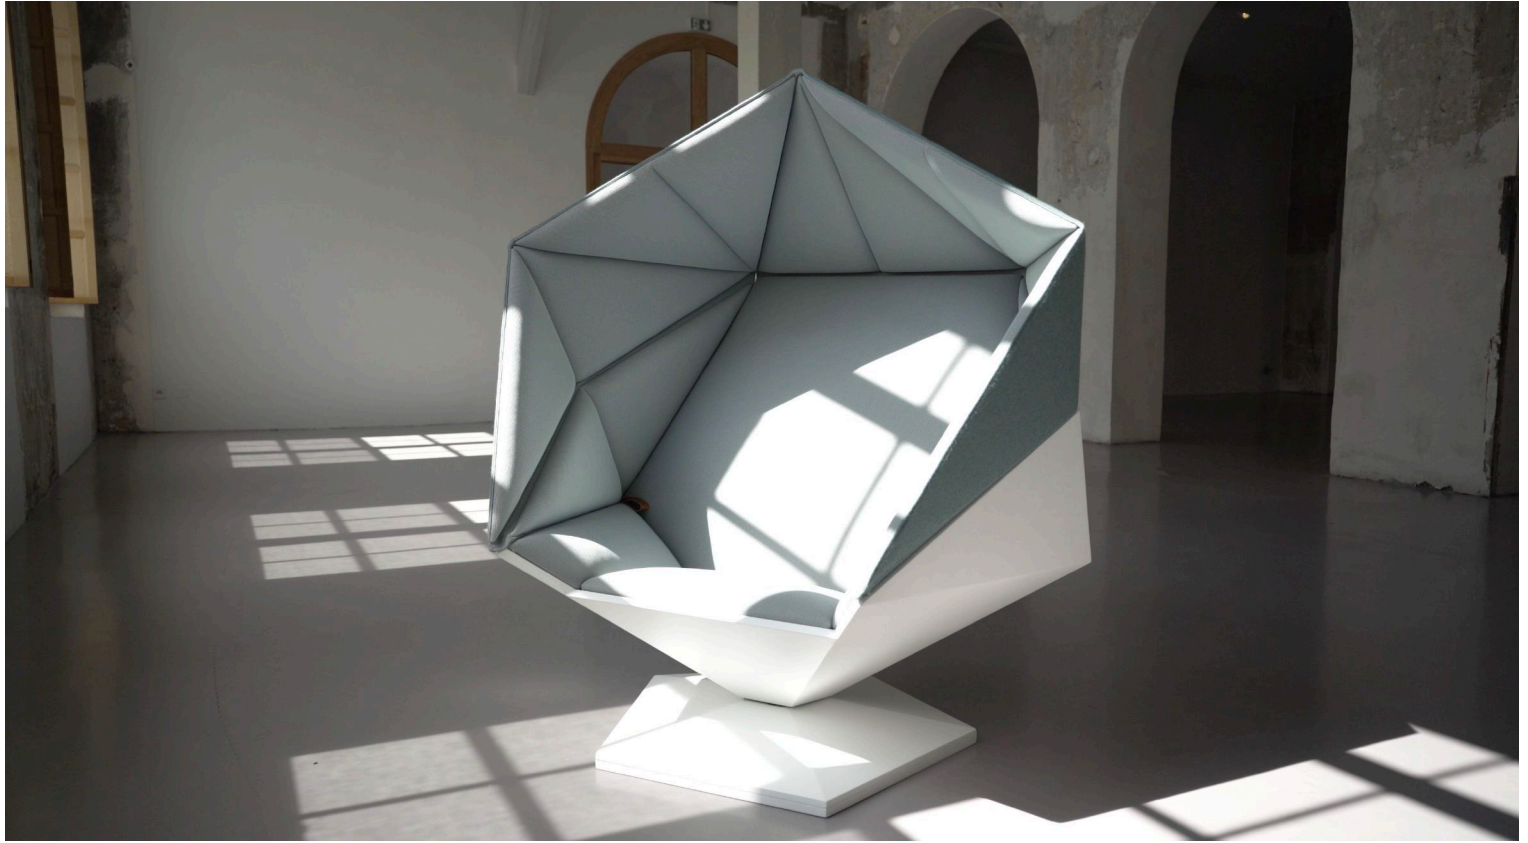

Registered model, Orri is made of a wooden structure, flexible cover, and cushions. The flexible cover, which is patent pending, benefits from specific acoustic features.

Design, ergonomics, acoustics, engineering, crafting, Orri's approach and ethos deliver the best and make it something unique.

Designed in Paris and handmade in France, Orri's edition is numbered and signed by Gaël Hiétin.

About Noppi

« Shape your privacy » is the signature of this new Parisian furniture company.

At the beginning there is a thought. Within cities, space is becoming increasingly shared and multi-functional. Whether it be open-spaces, co-working spaces, or co-living spaces, modular spaces have the ability to welcome various people, uses, needs, and atmospheres.

As spaces evolve, we are finding ourselves sharing, communicating, and exchanging constantly with one another. This may energize for our social side, but we raise a question: don't you feel the need for a break from time to time? A need for time for yourself, when other people fade away so you can focus, relax or rest...

At Noppi, we believe this is a sincere feeling and that a person's well-being is enhanced by establishing a healthy balance between social interaction and one's personal time. Wouldn't it be perfect if you could easily make the switch?

Noppi rethinks traditional furniture to allow you to easily materialize your own private and quiet cocoon, for a moment, your moment.

For those who understand the true value of Privacy.

FUTURE ON STAGE
